

# Get a Google MAPS API Key

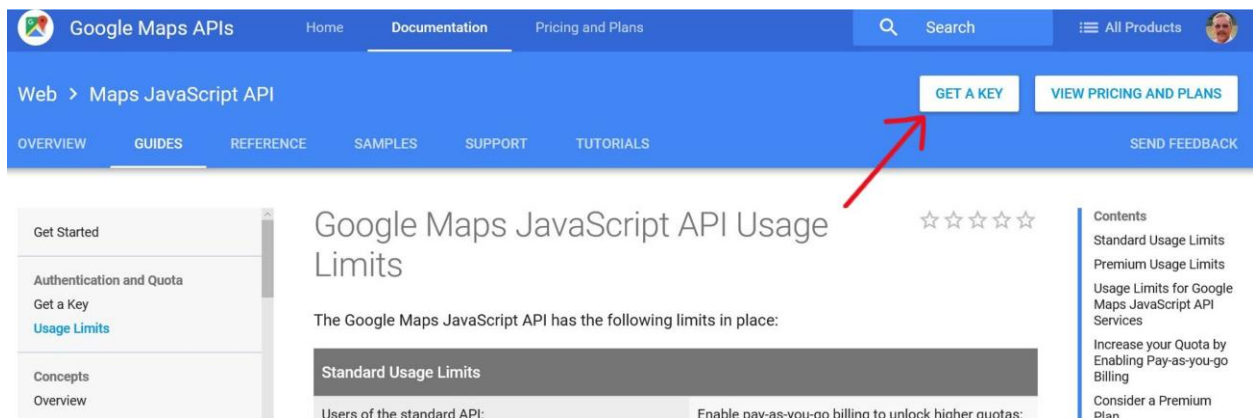

**You must have a Google Account that you use to login to Google services to follow these instructions.**

Start by going to Google.com in your browser and login to Google.

Then go to the following web site URL:

<https://developers.google.com/maps/documentation/javascript/usage>

Click on the Get a Key button shown below:

You will see a message from Google such as the following:

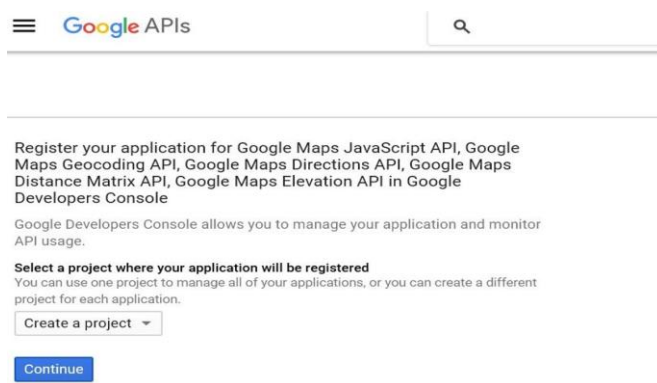

## Activate the Google Maps JavaScript API

To get you started we'll guide you through the Google Developers Console to do a few things first:

- 1 Create or choose a project
- 2 Activate the Google Maps JavaScript API and related services
- 3 Create appropriate keys

CANCEL CONTINUE

Click on Continue. Next you will see a screen like the following:

Click on Continue.

## Get a Google MAPS API Key

Google will ask you what type of key to create.

### Create a new key

You need an API key to call certain Google APIs. The API key identifies your project. Also, it is used to enforce quotas and handle billing, so keep it safe.

Server key

Browser key

Android key

iOS key

Click on Browser Key.

On the next screen enter a name for your key such as “My Website Key” and then press the Create button.
